ATTORNEY DOCKET NO. 14014.0342U2 APPLICATION NO. 09/910,588

Listing of Claims

- 1. (previously presented) A method of producing a bisubstrate inhibitor in a cell, comprising introducing into the cell a N-bromoacetylated acetyl acceptor substrate or a N-chloroacetylated acetyl acceptor substrate for an acetyltransferase present in the cell.
- 2. (original) The method of claim 1, wherein the acetyltransferase is produced by the cell.
- 3. (original) The method of claim 1, wherein the acetyltransferase is produced in a cell from an exogenous nucleic acid encoding the acetyltransferase.
- 4. (cancelled) The method of claim 1, wherein the alkylating derivative of the acetyl acceptor substrate is selected from the group consisting of a N-bromoacetylated acetyl acceptor substrate, a N-chloroacetylated acetyl acceptor substrate and a N-fluoroacetylated acetyl acceptor substrate.
- 5. (previously presented) The method of claim 1, wherein the acetyltransferase is arylalkylamine N-acetyltransferase (AANAT) and the acetyl acceptor substrate is selected from the group consisting of N-bromoacetyltryptamine, N-bromoacetylserotonin, N-bromoacetylphenylethylamine, N-bromo-acetylmethoxytryptamine, N-bromoacetyltyramine, N-chloroacetyltryptamine, N-chloroacetylphenylethylamine, N-chloro-acetylmethoxytryptamine and N-chloroacetyltyramine.
- 6. (previously presented) A method of inhibiting the activity of an acetyltransferase in a cell, comprising introducing into the cell a N-bromoacetylated acetyl acceptor substrate or a N-chloroacetylated acetyl acceptor substrate for an acetyltransferase present in the cell under conditions whereby a bisubstrate inhibitor will be produced, thereby inhibiting the activity of the acetyltransferase in the cell.

- 7. (original) The method of claim 6, wherein the acetyltransferase is produced by the cell.
- 8. (original) The method of claim 6, wherein the acetyltransferase is produced in a cell from an exogenous nucleic acid encoding the acetyltransferase.
- 9. (cancelled) The method of claim 6, wherein the alkylating derivative of the acetyl acceptor substrate is selected from the group consisting of a N-bromoacetylated acetyl acceptor substrate, a N-chloroacetylated acetyl acceptor substrate and a fluoroacetylated acetyl acceptor substrate.
- 10. (previously presented) The method of claim 6, wherein the acetyltransferase is arylalkylamine N-acetyltransferase (AANAT) and the alkylating derivative of the acetyl acceptor substrate is selected from the group consisting of N-bromoacetyltryptamine, N-bromoacetylserotonin, N-bromoacetylphenylethylamine, N-bromo-acetylmethoxytryptamine, N-bromoacetyltyramine, N-chloroacetyltryptamine, N-chloroacetyltyramine, N-chloroacetyltyramine, N-chloroacetyltyramine, N-chloroacetyltyramine, and N-chloroacetyltyramine.
- 11. (previously presented) A method of inhibiting melatonin production in a cell which produces melatonin, comprising introducing into the cell a N-bromoacetylated acetyl acceptor substrate or a N-chloroacetylated acetyl acceptor substrate of AANAT which is selected from the group consisting of N-bromoacetyltryptamine, N-bromoacetylserotonin, N-bromoacetylphenylethylamine, N-bromo-acetylmethoxytryptamine, N-bromoacetyltyramine, N-chloroacetyltyramine, N-chloroacetyltyramine, N-chloro-acetylmethoxytryptamine, and N-chloroacetyltyramine.
- 12. (cancelled) A method of increasing the amount of serotonin in a cell which produces serotonin, comprising introducing into the cell an alkylating derivative of the

acetyl acceptor substrate of AANAT which is selected from the group consisting of N-bromoacetyltryptamine, N-bromoacetylserotonin, N-bromoacetylphenylethylamine, N-bromoacetyl-methoxytryptamine, N-bromoacetyltyramine, N-chloroacetyltryptamine, N-chloroacetylphenylethylamine, N-chloro-acetylmethoxytryptamine, N-chloroacetyltyramine, N-fluoroacetyltryptamine, N-fluoroacetylserotonin, N-fluoroacetylphenylethylamine, N-fluoro-acetylmethoxytryptamine and N-fluoroacetyltyramine.

- 13. (cancelled) A method of treating a subject for a disorder caused by a decreased amount of serotonin, comprising administering to the subject an alkylating derivative of the acetyl acceptor substrate of AANAT which is selected from the group consisting of N-bromoacetyltryptamine, N-bromoacetylserotonin, N-bromoacetylphenylethylamine, N-bromo-acetyl-methoxytryptamine, N-bromoacetyltyramine, N-chloroacetyltryptamine, N-chloroacetylserotonin, N-chloroacetylphenylethylamine, N-chloro-acetyl-methoxytryptamine, N-chloroacetyltyramine, N-fluoroacetyltyramine, N-fluoroacetyltryptamine, N-fluoroacetylphenylethylamine, N-fluoro-acetyl-methoxytryptamine and N-fluoroacetyltyramine.
- 14. (cancelled) The method of claim 13 wherein the disorder is selected from the group consisting of depression, obsessive compulsive disorder, schizophrenia, mania, sleep/wake disorder, panic attack, migraine headache, cluster headache, insomnia, bipolar disease and attention disorder.
- 15. (currently amended) A cell comprising a bisubstrate inhibitor, wherein the bisubstrate inhibitor comprises an alkylating derivative of a N-bromoacetylated acetyl acceptor substrate or a N-chloroacetylated acetyl acceptor substrate for an acetyltransferase present in the cell and CoA.

ATTORNEY DOCKET NO. 14014.0342U2 APPLICATION NO. 09/910,588

- 16. (original) The cell of claim 15, wherein the acetyltransferase is produced by the cell.
- 17. (previously presented) The cell of claim 15, wherein the acetyltransferase is produced in the cell from an exogenous nucleic acid encoding the acetyltransferase.
- 18. (cancelled) The cell of claim 15, wherein the alkylating derivative of the acetyl acceptor substrate is selected from the group consisting of a N-bromoacetylated acetyl acceptor substrate, a N-chloroacetylated acetyl acceptor substrate and a N-fluoroacetylated acetyl acceptor substrate.
- 19. (previously presented) The cell of claim 15, wherein the acetyltransferase is arylalkylamine N-acetyltransferase (AANAT) and the acetyl acceptor substrate is selected from the group consisting of N-bromoacetyltryptamine, N-bromoacetylserotonin, N-bromoacetylphenylethylamine, N-bromoacetylmethoxytryptamine, N-bromoacetyltyramine, N-chloroacetyltryptamine, N-chloroacetyltryptamine, N-chloroacetylmethoxytryptamine, and N-chloroacetyltyramine.
- 20. (original) The cell of claim 19, wherein the cell is selected from the group consisting of a pineal gland cell and a retinal cell.
